Artesian Water in New Mexico

Another Fatal Disaster at Bodie.

Congressional Proceedings, Etc., Etc.

SPECIAL DISPATCHES TO PROSPECTOR.

Senate.

WASHINGTON, July 23.—The senate proceeded to the consideration of the house bill to transfer the revenue marine service, the bill having been read. The date of the appointment of revenue marine officers, to be officers of the navy was fixed for January 1, 1891, so that practically it would be of no service in the collection of customs revenue. The only object of the bill was to advance the pay of officers to the extent of \$181,000 a year and to have them entitled to be placed on the retired list. These officers had not asked for the measure.

Colorado.

PUEBLO, July 23.—At the annual stockholders' meeting of the Colorado Mineral Palace, held this afternoon the number of directors was increased from 7 to 11 members. The first seven composed the old directory and each director received every vote cast. The capital stock was increased from \$100,000 to \$150,000. An active campaign is to be inaugurated and the work pushed forward from this time with the utmost vigor.

Artesian Water.

ALBUQUERQUE, July 23.—Artesian water was struck near Springer yesterday at a depth of only 250 feet. This is in the line of a boom for New Mexico and is an emphatic voucher for the statement that water can be obtained by going after it. Many wells will be sunk in consequence of this discovery.

A Disaster.

BRIDGEPORT, Cal. July 23.—Word has been received here that Dr. N. H. Goodson and A. S. Montrose, were blown up by the explosion of a steam boiler at Bodie. Goodson was killed outright and Montrose had both legs blown off and his head badly crushed. He will undoubtedly die.

Denver.

DENVER, July 23.—Supervisor of census, Geo. L. Soprit, announced the population of Denver and suburbs as 129,986. This shows an increase of former figures of 7,000, which has been added by the re-census of the city by the citizens' committee.

Assignment.

KANSAS CITY, July 23.—The Centropolis Car and Machine company assigned today. Assets and liabilities \$185,090 and \$100,000 respectively.

Want the Duty Removed.

WASHINGTON, July 23.—This afternoon delegates to the annual convention of the National Glassblowers' Association, which has been in session in Baltimore, presented to the senate committee on finance a request that the duties laid by the house bill on glass bottles be repealed. Their president said within the past two years there had sprung up a competition with foreign importers which the home

manufacturers could not meet. The delegation contained, he said, none but laborers.

Cattle Market.

KANSAS CITY, July 23.—The Live Stock Indicator reports:

Cattle—Receipts 6000; shipments 4800; market is steady; Steers 325.00@4.40; cows, 1.75@3.00; stockers and feeders, 2.00@3.50.

Metals.

NEW YORK, July 23, 1890.

COPPER—Nominal; Lake, July \$16.75.

LEAD—Steady; Domestic \$4.50.

TIN—Steady; Straits, \$21.50.

SILVER—Bar, 109 1/2.

MINING NOTES.

Turquoise Mining Company.

Owing to the condition of the roads incident to the rainy season the daily shipments of ore from the properties of this company vibrate from 15 to 20 tons, this being shipped to El Paso. This amount of output could be trebled without taxing the reserve showing in the Silver Bill alone. On the 4th of the month sinking was resumed on the main Silver Bill shaft. Over 6000 tons of second grade ore grace the dump.

Mohave County.

The mining outlook in Mohave county is not of the boom nature, but of the steady, come-to-stay kind.—[Mohave Miner.]

The Buffalo Smelter.

At the Buffalo smelter the boiler and stack were set up the past week and good progress made in the erection of the coke bin and engine house. Next week the whistle will be heard for the first time, as the boiler will be fired up and sinking resumed in the well. At the mine prospect work continues with good results. The ore bins and inclined tramway have been completed, and many other necessary, though unimportant, improvements made.—[Silver Belt.]

Old Dominion.

The affairs of the Old Dominion Copper Company are in a satisfactory condition. The flow of water in the mine, which has been nearly 200,000 gallons per day for the past month, is decreasing. Rapid progress is being made with the new ore bins and they will be completed about August 1st. The force of men employed by the company is larger than ever, and the outlook is promising for a steady run of two furnaces.—[Silver Belt.]

The New York Copper Market.

J. Friedenstein, a prominent metal broker of New York, in a recent letter to Dr. Alex. Trippel, writes very encouragingly of the future of copper. He states that the market has increased in firmness and producers of Lake copper have found difficulty in supplying the demand. So great is the demand that consumers have placed orders for delivery to October inclusive, and in some cases to the end of the year, paying as high as 17c for Lake cakes and wire bars.

Mr. Friedenstein says that "while prophecies are that Lake copper will reach 20c, I hardly feel so sanguine myself, and think 18c. represents as high a figure as can be reached without materially affecting conditions of demand and supply. Above this figure, while the electrical construction now going on all over the country will not be interfered with, there is a demand in other directions, such as

brass castings, etc., for which iron and other metals would be substituted in a measure, as was the case two years ago, when the syndicate advanced the price to 18c. for Lake. For the present, at least, the prophecies are that prices will be well maintained, with the possibility of further advance. This, likewise, holds good for Arizona copper, the disparity in price between this grade and Lake having been pretty well covered, the difference now existing between refined and Lake being about 1c. per pound.

"Altogether the prospects for profits in copper mining in Arizona again loom up, and I hope your various companies will become producers in time to get benefit of present high prices."—[Silver Belt.]

The Tin Cup Mine.

There is no doubt that the ore averages at least \$1000 a ton. If the streak or vein just discovered is continuous in depth to the usual extent of contact veins, there is more gold in camp than has been discovered since the days of the Pike's Peak excitement. Yesterday morning there lay disclosed a vein of ore of fifteen feet in thickness, the bottom eight feet being iron manganese and the upper seven feet free gold-bearing quartz. The quartz is a light color, while porous free gold and flakes of gold are plainly visible. From an assay made of the ore on Wednesday got at Aspen it was found to run \$28 per ton in gold, besides iron.—[Inter-Ocean Mining Review.]

A fresh supply of wine of all kinds just opened at Nardin's.

Just received the latest styles of
